RemainSafe Commercial Storm Shelters Further Safe Working Conditions

RemainSafe shelters protect people and insure investments

Decatur, AL (June 28, 2023) - [RemainSafe commercial shelters](#) are built with you and your team in mind. Workplace safety is often centered around preventable accidents with a concentration on employee preparedness and awareness. However, workplace safety sometimes falls outside the scope of employee control. [RemainSafe](#) provides business owners and employees with the safety, security and confidence to live and work without fearing inclement weather.

Many areas of workers' safety are often overlooked or inadequately addressed. One such area can be found in tornado preparedness. Although tornadoes can occur with little to no warning, these destructive weather events still qualify as anticipated hazards which OSHA requires employers to protect workers from. Recent studies have suggested a geographical shift in tornado patterns, meaning more are occurring in areas that fall outside traditional tornado hotspots such as Texas, Oklahoma, Kansas and Nebraska.

Not only are tornadoes occurring in more diverse locations, but they also occur more frequently and in smaller windows of time rather than spreading out over weeks or months as once recorded. Due to these changes, areas which may have gone years undisturbed by severe weather tornadoes may soon find businesses and their employees facing unanticipated risks. Tornadoes are not preventable, but at many times tragedies are. When considering recent shifts in tornado patterns and the persistent gaps in employee safety measures, the need for accessible safety options is more pressing than ever.

"At RemainSafe, we understand that purchasing a storm shelter for your business is a serious responsibility. Our team places you and your teammates' security at the forefront of every design, which is why our commercial shelters surpass both [FEMA](#) and [ICC-500](#) guidelines and requirements," said Paul Chapman, VP of RemainSafe.

Behind a door secured by keypad entry, each commercial shelter contains a trauma kit that holds materials that assist in administering lifesaving first aid. RemainSafe's commercial shelters are also outfitted with a smoke detector, carbon monoxide detector and fire

extinguisher. While safety is always the top priority at RemainSafe, we also endeavor to deliver maximum comfort to those seeking shelter. LED lighting, ventilation systems and front-to-back benches have been incorporated into our standard designs and additional shelter amenities are available upon request. Some of these features, like wash stations and chemical toilets, can ensure the shelter remains secure and sanitary during prolonged periods of refuge.

RemainSafe's commercial shelters are fully mobile and customizable while retaining the ability to withstand the 250+ MPH wind speeds characteristic of an EF-5 Tornado. Shelters can be securely installed via an anchoring system on preexisting concrete slabs with sufficient surface area, although no such preexisting structures are required. This is because RemainSafe shelters are also available in wholly freestanding designs, the weight of which guarantees the shelter's fortitude and the safety of those within.

Good afternoon,

My name is Audrey Funchess, and I wanted to introduce myself and my client [RemainSafe](#). RemainSafe manufactures storm shelters and safe rooms for residential and commercial markets. Founded more than 15 years ago, RemainSafe continues to provide business owners and their employees the safety, security and confidence to operate without fearing inclement weather.

Workplace safety is often centered around preventable accidents with a concentration on employee preparedness and awareness. However, workplace safety sometimes falls outside the scope of employee control. [RemainSafe commercial shelters](#) are built with you and your team in mind.

I have attached a press release that includes more details on how RemainSafe commercial storm shelters further safe working conditions as well as a shelter rendering. Please contact me, if you would be interested in speaking with Andy Smith, RemainSafe Founder and CEO or Paul Chapman, VP of RemainSafe to learn more about the contract and RemainSafe shelters.

Thanks,
Audrey Funchess
